

HEATER KIT

HEATER KIT COMPONENTS:--

- (1) Thermostat and Heater Assembly/Harness
- (2) #4-40 Screw and Washer (X4)
- (3) Cable Ties (X4)

INSTALLATION INSTRUCTION:--

- (1) Install the Thermostat and Heater Assembly onto the base plate with the #4-40 screws and washers.
- (2) Connect the Red Wire to the +12V terminal (left most position on the terminal block) and the Black Wire to the -12V terminal. To ensure proper connection to the terminal, turn the terminal block screws all the way out before inserting the wire into the hole. After tightening the screws, check for proper engagement by pulling on the wire. If the wire became dislodged, it was not inserted properly into the hole.
- (3) Use the Cable Ties to secure the added wires to the main harness at the arrow locations.
